EXPERIENCE

Senior Software Engineer **SRM Asset**

03/2026 – present

Backend integrations with B3 and CERC registries for Duplicatas Escriturais (book-entry trade receivables). Integration with QI Tech. Heavy AI-assisted delivery: RAG, the BMAD agile-AI method, and LLM best practices (evals, structured output, guardrails, MCP).

Java | Spring Framework | Aurora PostgreSQL | AWS | Docker | MyBatis | RabbitMQ | Keycloak | Terraform/HCL | RAG | BMAD | MCP

Senior Engineer **C6 Bank**

04/2025 – 03/2026

Responsible for designing, implementing and maintaining high-availability, performant critical systems, with information security for credit granting.

MongoDB | PostgreSQL | Splunk | Kotlin | Harness | Spring Framework | Docker | Grafana | Koin/Javalin | Domain-Driven Design | Event Sourcing

Web Developer **Fiserv**

03/2024 – 04/2025

POS-related software development, support, monitoring and maintenance. Strong role in DevSecOps, CI/CD pipelines and both technical and processual documentation. Focus on disaster prevention and recovery.

Splunk | Dynatrace | Spring Framework | Oracle SQL Server | Docker | Fortify | Sonar | Mercurial | CyberArk | GNU/Linux | Redis | ServiceNow

Backend Developer (Freelance) **Upwork**

Oct 2022 – Jan 2024

Solo contractor on Upwork for international clients. Backend services and web data-extraction/automation across diverse sources. English-language client communication.

Python | lxml | BeautifulSoup | pup | Headless Chromium | PhantomJS | Bash scripts

Backend Developer **Conta Azul**

Sep 2021 – Aug 2022

Accounting solutions. Implemented a system to automatically manage periodic and aperiodic tax obligations related to brazilian SPED/eSocial government modules.

Java 8, 11, 15, 16 | AWS Queues, Storage and Infrastructure | Terraform/HCL | PostgreSQL | LogDNA | Spring Framework

Backend Developer **Grão**

Dec 2020 – Sep 2021

Implementing the backend for supporting the brazilian instant payment system Pix in Kotlin. Container-based environments for testing and production. Daily tasks: performance-focused database entity modeling and MVC-based, scalable REST API design and QA testing.

Java EE | Kotlin | MySQL | Lens | GitLab Pipelines | Google Firebase | Spring Framework | Feign Client | Graylog
